# YOUR BUILDING, JUST SMARTER

Take control of your building's **comfort** and **efficiency** while **minimizing energy costs** with a building automation system.

Our building automation system offers a range of powerful features that can make your building smarter, ultimately **saving you energy and money**. With fully-integrated analytics, here are some of the key benefits you can experience from this system:

## Reduce Energy **Costs**

WebCTRL® allows for more **accurate monitoring** of energy usage, helping you to **save money** on energy costs.

## Maximize Occupant **Comfort**

With advanced control strategies, you can ensure the **comfort and safety of occupants** by monitoring environmental factors and controlling temperature.

## Increase Energy **Efficiency**

WebCTRL® can be programmed to run at **peak efficiency**, ensuring that your building is operating as efficiently as possible.

## Cloud Hosting & Remote **Monitoring**

WebCTRL® can be securely hosted, monitored and managed remotely, allowing you to take **immediate action** if problems arise.

## Maintenance **Automation**

WebCTRL® can be programmed to perform routine maintenance tasks, **saving time and money**.

## System **Expansion**

With the system's open architecture, you can **easily integrate** new devices and protocols, allowing for more advanced control strategies and greater system expansion.

## Data **Collection**

WebCTRL® stores data from the system and makes it available for **reporting and analysis**.

## Backward **Compatibility**

Take advantage of the **latest technological building automation system advancements** without having to reconfigure your system.
