

ESP
ENERGY SOLUTIONS PROGRAM
HARRIS Integrated Solutions

Reduce Energy Use & Maintain Facility Comfort

The Energy Solutions Program (ESP) is a 3-tier strategy designed to help you reduce energy use while maintaining comfort for patients, visitors and staff.

With ESP, you can make a *positive impact* on the environment and *save money* on energy bills while keeping within your healthcare facility's budget.

TECHNOLOGY

1

With WebCTRL, you can **easily monitor** and adjust your facility's energy usage and **maximize comfort**.

TRACKING

2

With Energy Star's Portfolio Manager, you can **track and compare** your facility's energy usage with **other similar facilities**.

COMMUNICATION

3

EnergyIQ Reports provides you with an **in-depth view** of your facility's energy usage and performance to help **identify areas of inefficiency**.

Interested in reducing energy usage while maintaining a comfortable environment for your healthcare facility?
